

SWIHA

COVID-19 Guidelines

Effective Thursday, January 6th, 2022, and in alignment with City of Tempe and CDC guidelines due to the fact Maricopa County is currently considered an area of high transmission for COVID, SWIHA is aligning with state and federal guidelines:

At SWIHA and SOY, we RECOMMEND and ENCOURAGE indoor masking for all teachers, staff, students, and visitors regardless of vaccination status.

To ensure we provide a safe learning environment, all students, staff, and faculty must understand and agree to comply with the following health and safety requirements when on campus.

- Do not come to campus if you are sick or if you have any signs or symptoms of illness or answer yes to any of these questions:
 - Have you had a persistent cough?
 - Do you currently think you have a fever?
 - Have you had a headache?
 - Have you been exposed to anyone who has been diagnosed with COVID-19, or has exhibited these symptoms within the past 14 days?
 - Are you living with anyone who is sick or quarantined?
- Report any confirmed case of covid-19 to your instructor or academic advisor (student) or Dr. Brad Bouté (employees).

If you do become ill with Covid, or Covid like symptoms, SWIHA follows updated CDC guidelines as follows:

1. If you are experiencing any of the following symptoms, which are related with the newer strains of Covid-19, you are to stay home and quarantine for 5 days: Headache, fatigue, sinus congestion, sore throat, difficulty breathing, fever, cough, new loss of taste or smell.
2. Report your status to Dr. Brad Bouté at bradb@swiha.edu
3. After the 5 days, when you return to campus, you are required to wear a mask for an additional 5 days.

If you have been exposed to someone who was diagnosed with Covid-19, you may still come to campus. However, you are required to wear a mask for 14 days from the date of exposure.

Any student who is experiencing symptoms of illness, or who has questions about any of the above provisions should contact your instructor or Academic Advisor as soon as possible.

Any staff or faculty member experiencing symptoms of illness or who has questions about any of the above provisions should contact Dr. Brad Bouté as soon as possible.
